

Our Implicit Belief in Architecture's Dynamism

Decorations and finishes of ideas in all interior and exterior implementation.

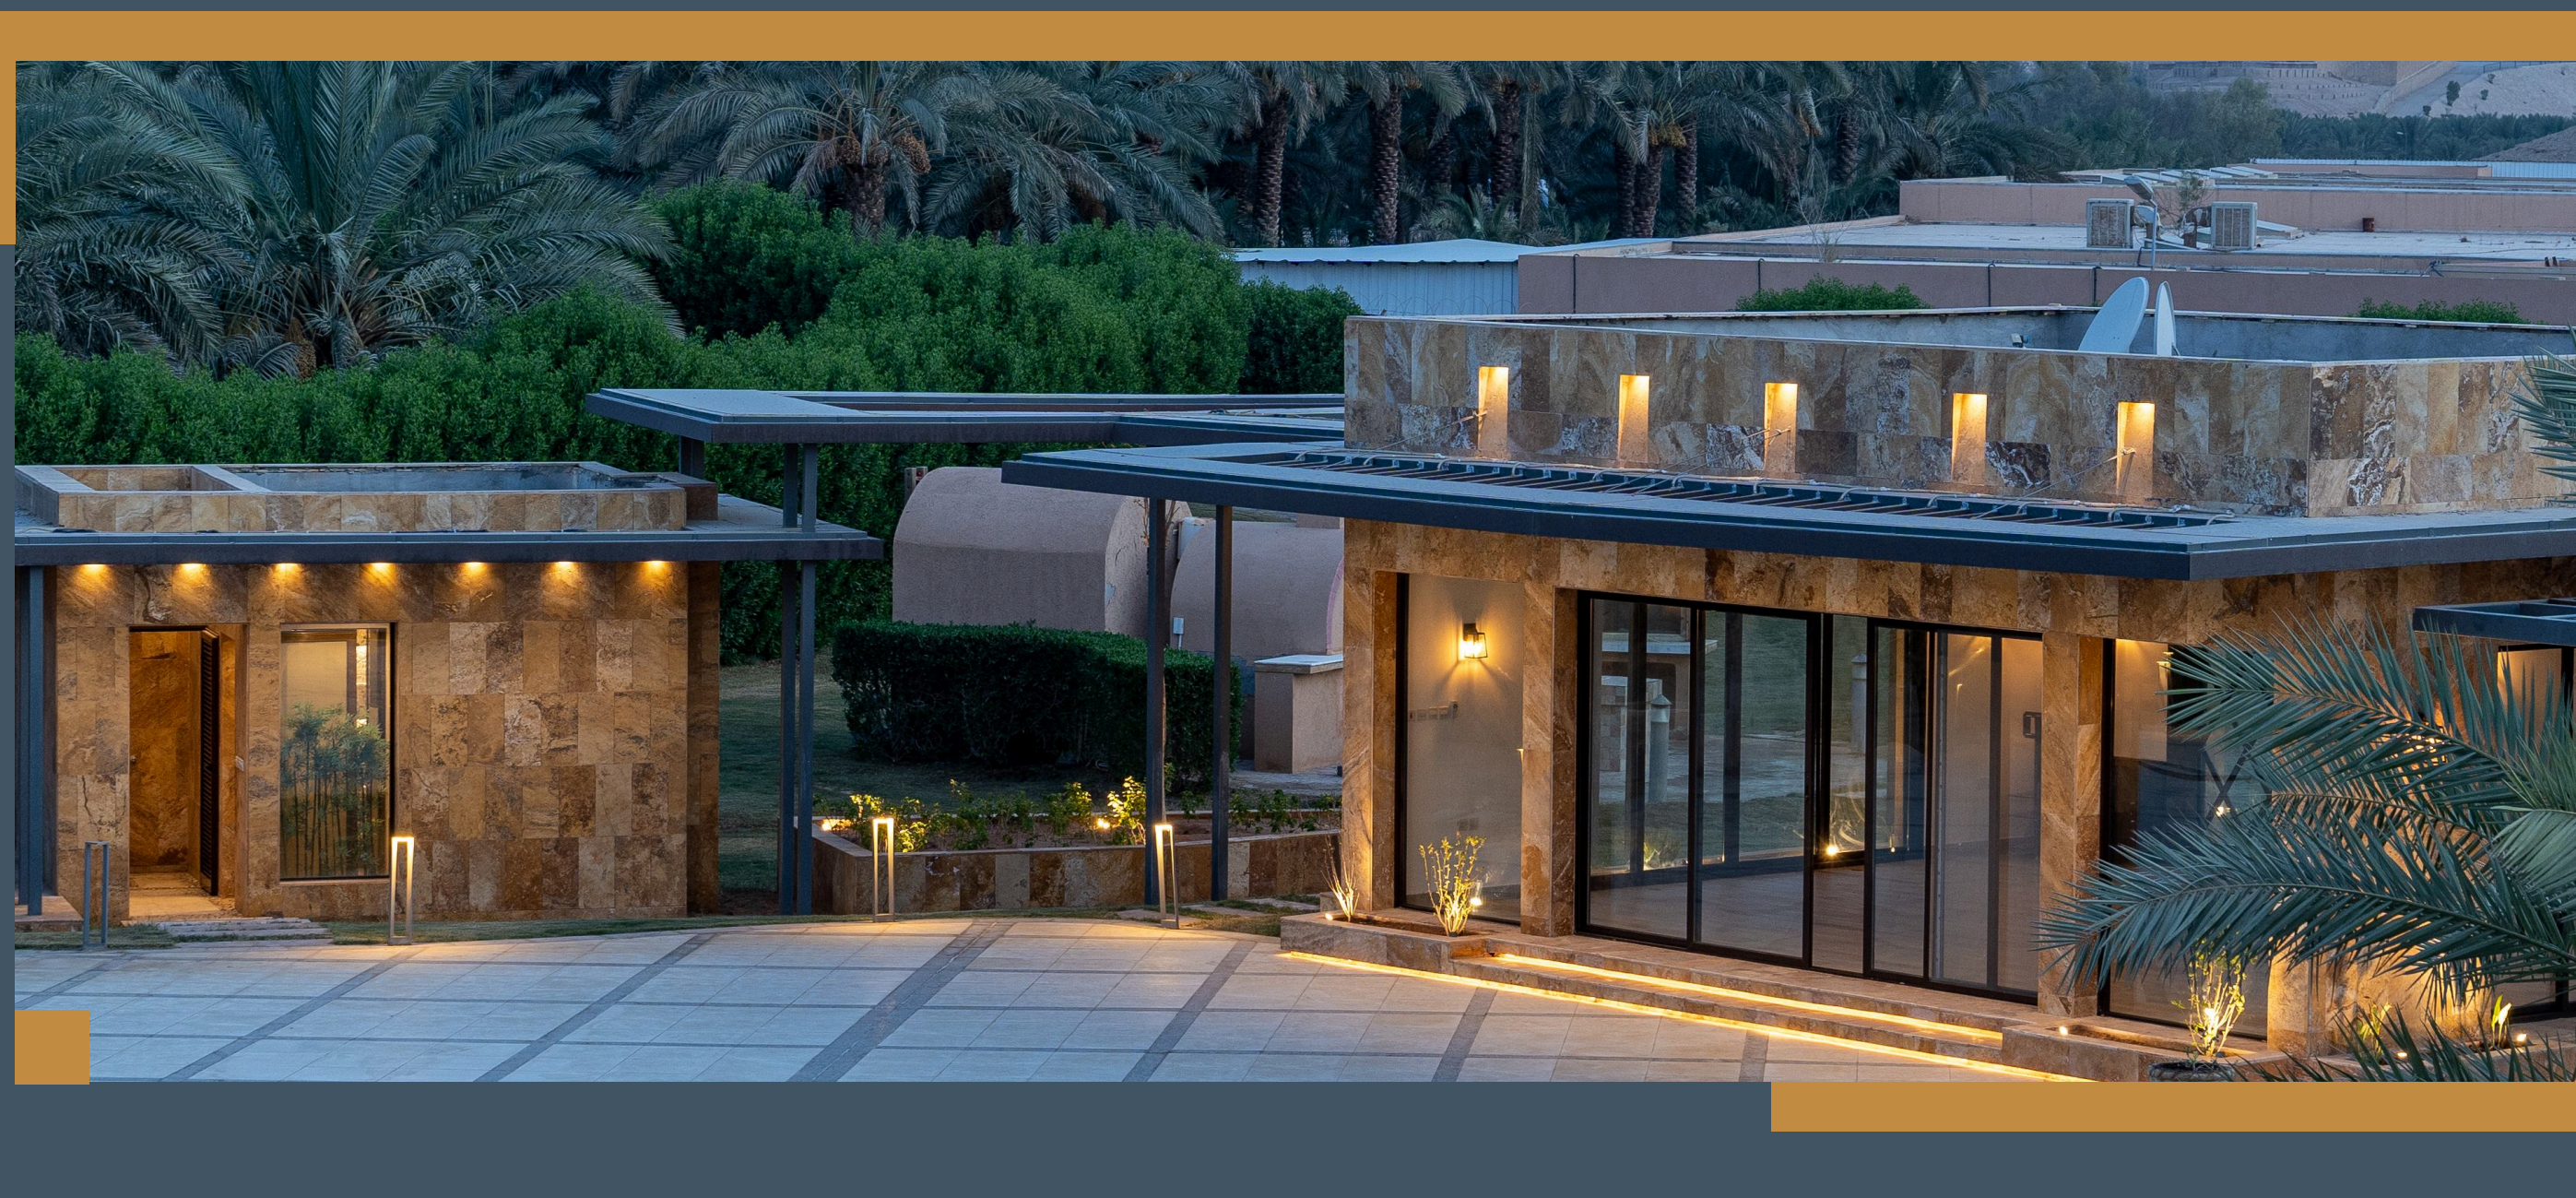

To achieve uniqueness in all that we do, adding elements of nature

Our architectural team excels at creating visually appealing and function-driven spaces. We specialize in residential, commercial, and industrial architectural design, tailoring our designs to meet the unique needs of each client

Innovative architectural designs

The place where you spend your time is a direct reflection of your culture

Our works goes through three stages

01

Design

The design stage begins by developing an understanding of our clients' needs and predispositions in an initial consultation with one of our designers. After this dialogue, we present the first draft of the design with a full explanation of our suggestions and their rationale.

After client feedback, we rework our design to include any required modifications.

After their approval we finalize the design and take full measurements.

02

Pricing and Materials Approval

Once full measurements have been calculated and quantities estimated,

We present a comprehensive cost analysis, giving clients a range of material options commensurate with their project and budget.

[View Project →](#)

03

Implementation

After approving the plans and with the clients approval of carefully chosen materials,

We carry out the finishing and decoration work, monitoring the fit-out throughout its progress.

After this, we provide our clients with peace of mind thanks to our aftersales service.

Satisfied Client

One step towards your dream home

Challenging ourselves in every project

We are also committed to bioengineering in order to produce a healthier and more sustainable environment in all our solutions, utilizing nature to create humane spaces that stand out from the visual monotony of the urban landscape.

Introduction

We are living in a time of rapid urban growth with increasingly busy and fast lifestyles characterized by movement and commotion – so much so that the need to humanize architecture has never been more important.

Our Vision

To be the first choice for quality in implementation and innovation of ideas in all interior and exterior decorations and finishes.

Our Mission

To achieve uniqueness in all that we do, adding elements of nature in order to humanize the spaces we create, balancing form, function and aesthetics.

Our Work

All Novo work is undertaken under one brand in order to ensure quality in materials and implementation. We pride ourselves in offering inimitable ideas and solutions which create harmony and coherence between each stage of the project. We employ familiar materials but use them innovatively.

Our Success

01/03

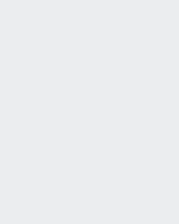

We are living in a time of rapid urban growth with increasingly busy and fast lifestyles characterized by movement and commotion – so much so that the need to humanize architecture has never been more important. This means reconsidering the form and functions of our buildings and the materials we use, a prevalent trend in our industry which, more and more, seeks to provide an environment that understands people's needs and shield them from the noise and bustle of the city streets. This encapsulates the Novo Design & Build approach. It begins with our name, one which promises authentic human feelings, taking us back to a time of serenity and spaciousness and looking ahead to 'smart', modern solutions.
